

# The DOCTOR SHOPPER<sup>SM</sup>

(Notes on Page Two)

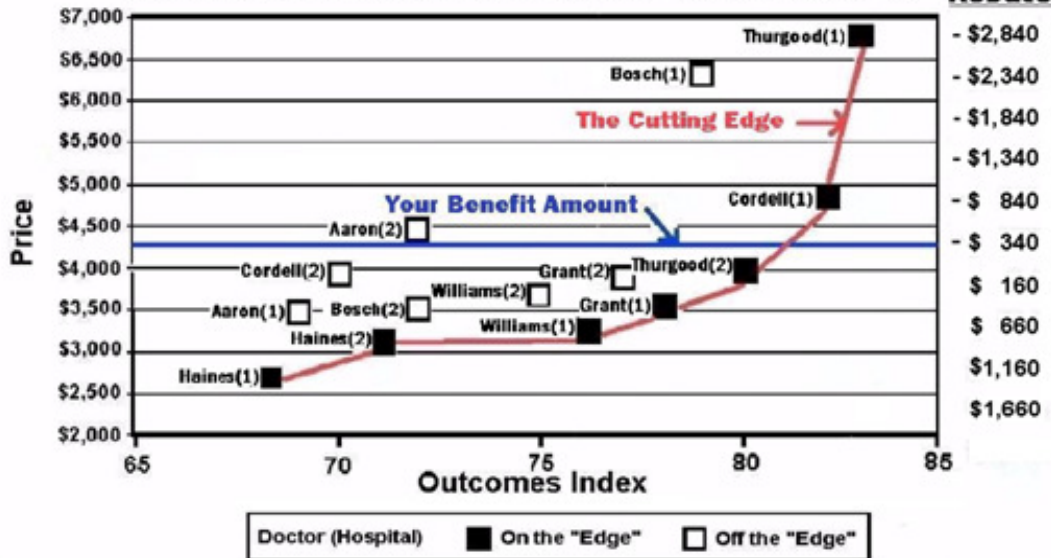

DATE: November 15, 2012 TREATMENT PLAN: 9098,IC4316  
 YOUR DIAGNOSIS IS: 550.90 Repair, Initial, Inguinal Hernia, Reducible  
 PMN: \*\*\*\*\*3367 DOB: May 14, 1969 RECOMMENDED DOCTOR: P.T. Grant

## Diagnostician Quality

	HM Greene	Avg
Referral Satisfaction Index	86.3	84.2
Prognosis Rating Index	77.9	66.2
Diagnostic Accuracy Index	92.5	89.5

## VALUE CHART

FOR PATIENTS WITH: Inguinal Hernia Repair – Prognosis Rating = 8

### How to Find the Best Treatment Values

- Choose a doctor on or near **The Cutting Edge**.
- Decide how much extra you are willing to spend for the likelihood of an improved outcome. *Your choice!*
  - The likelihood of a better outcome (bottom scale) will cost you more (left scale).
- Doctors below the blue Benefit line will earn you a rebate. Doctors above this line will cost you extra. The right scale shows you how much.
- A chart showing doctors from a larger geographical area can be requested from the receptionist.

## PERFORMANCE

The RE-MEDI system offers three measures of a doctor's performance: 1) the Outcomes Index (100 is perfect) indicates how well patients with your diagnosis and prognosis rating have recovered under that doctor's care; 2) the Patient Satisfaction Index (100 is perfect) measures the overall satisfaction of a doctor's patients; and 3) the Nurses' Choice reports the number of different nurses (insiders who network and have good information) and their direct family members that a doctor has treated in the past year. For more information on interpreting the Outcomes Index regarding your diagnosis, ask the receptionist, or visit us online: [www.Health-USA.net](http://www.Health-USA.net).

	Community Average	Aaron	Bosch	Cordell	Grant	Haines	Oscar	Thurgood	Williams
<b>Outcomes Index (Prog. Rating = 8)</b>	72
